|----------|---|
| 1 |  A detailed schematic diagram of a heating system. It shows a central boiler connected to a network of pipes that branches out to multiple rooms. Each room has its own radiator. The diagram includes technical specifications and a legend. |
| 2 |  A schematic diagram showing a boiler connected to a single radiator in a room. The piping is simple and direct. |
| 3 |  A schematic diagram showing a boiler connected to a radiator in a room, with a bypass line for circulation. |
| 4 |  A schematic diagram showing a boiler connected to a radiator in a room, with a bypass line and a control valve. |
| 5 |  A schematic diagram showing a boiler connected to a radiator in a room, with a bypass line and a control valve, similar to diagram 4. |
